

CLSSettlement Membership

Mitigate settlement risk for your FX trades while benefiting from operational efficiencies, in addition to best-in-class netting and liquidity management. Our world-class payment-versus-payment settlement service delivers huge efficiencies and savings for our clients.

Our FX settlement service is available both directly, to settlement members, and indirectly, to third-party participants. Over 75 of the world's most important financial institutions chose to be settlement members – and over 38,000 more use our service, including banks, funds, non-bank financial institutions and multinational corporations. We offer a number of membership categories to meet the diverse needs of banks active in the FX market.

Reduce risk, improve efficiency and increase liquidity

We protect our members and their clients from the most significant risk in the FX market – settlement risk. We do this by simultaneously settling payment instructions relating to FX trades using our unique payment-versus-payment (PvP) system.

We deliver huge efficiencies and savings for our clients, maximizing the advantages of straight-through processing to deliver operational efficiencies and minimize associated costs. In addition, our approach to multilateral netting shrinks funding requirements by over 96% on average, so our clients can put their capital and resources to better use.

Eligibility

Given the interconnected nature of CLSSettlement, it is critical that prospective members meet our eligibility criteria. These have been established to mitigate liquidity, market, credit and certain operational risks to the settlement service, our participants and broader financial markets.

Potential members that meet the eligibility criteria have the option of becoming a shareholder settlement member or non-shareholder settlement member. The membership benefits for each type are identical. However, shareholder settlement members invest in shares of CLS Group Holdings and receive the associated shareholder rights. Non-shareholder settlement members have a different commercial construct in lieu of shareholding and no shareholder rights.
