

OTC Derivatives

Harness the joint infrastructure power of CLS and DTCC to better manage your OTC credit derivatives cash flows. Improve overall post-trade efficiency and risk management.

Regulatory reform has led to a changing FX settlement landscape with a heightened focus on pre- and post-trade transparency and an increased requirement for transactional reporting.

CLS's OTC Derivatives is an enhanced settlement service model for instructions relating to bilateral net payment obligations for the OTC credit derivatives market. Created in partnership with The Depository Trust & Clearing Corporation (DTCC), the service links DTCC's Trade Information Warehouse with CLS's central multicurrency cash settlement service and optimizes the processing of OTC credit derivatives-related cash flows.

How it works

Supports CLS settlement members and their third-party participants in nine currencies: AUD, GBP, CAD, CHF, EUR, HKD JPY, SGD and USD.

Instruction submissions: For each participating CLS settlement member, DTCC submits netted cash flow amounts for the next value date to CLS in the relevant currencies.

Validation: CLS accepts and validates the cash flows and the accounts.

Settlement: The DTCC cash flows are then incorporated into each settlement member's pay-in schedule and settlement cycle for the next day, along with their submitted FX payment instructions. These cash flows can be seen in the CLS GUI.

Notifications: Notifications are sent back to DTCC following settlement on value date.

Improves

- Post-trade processing
- Operational & funding efficiencies

Reduces

- Operational risk

6.5+ USD trillion

average settled each day

Awards

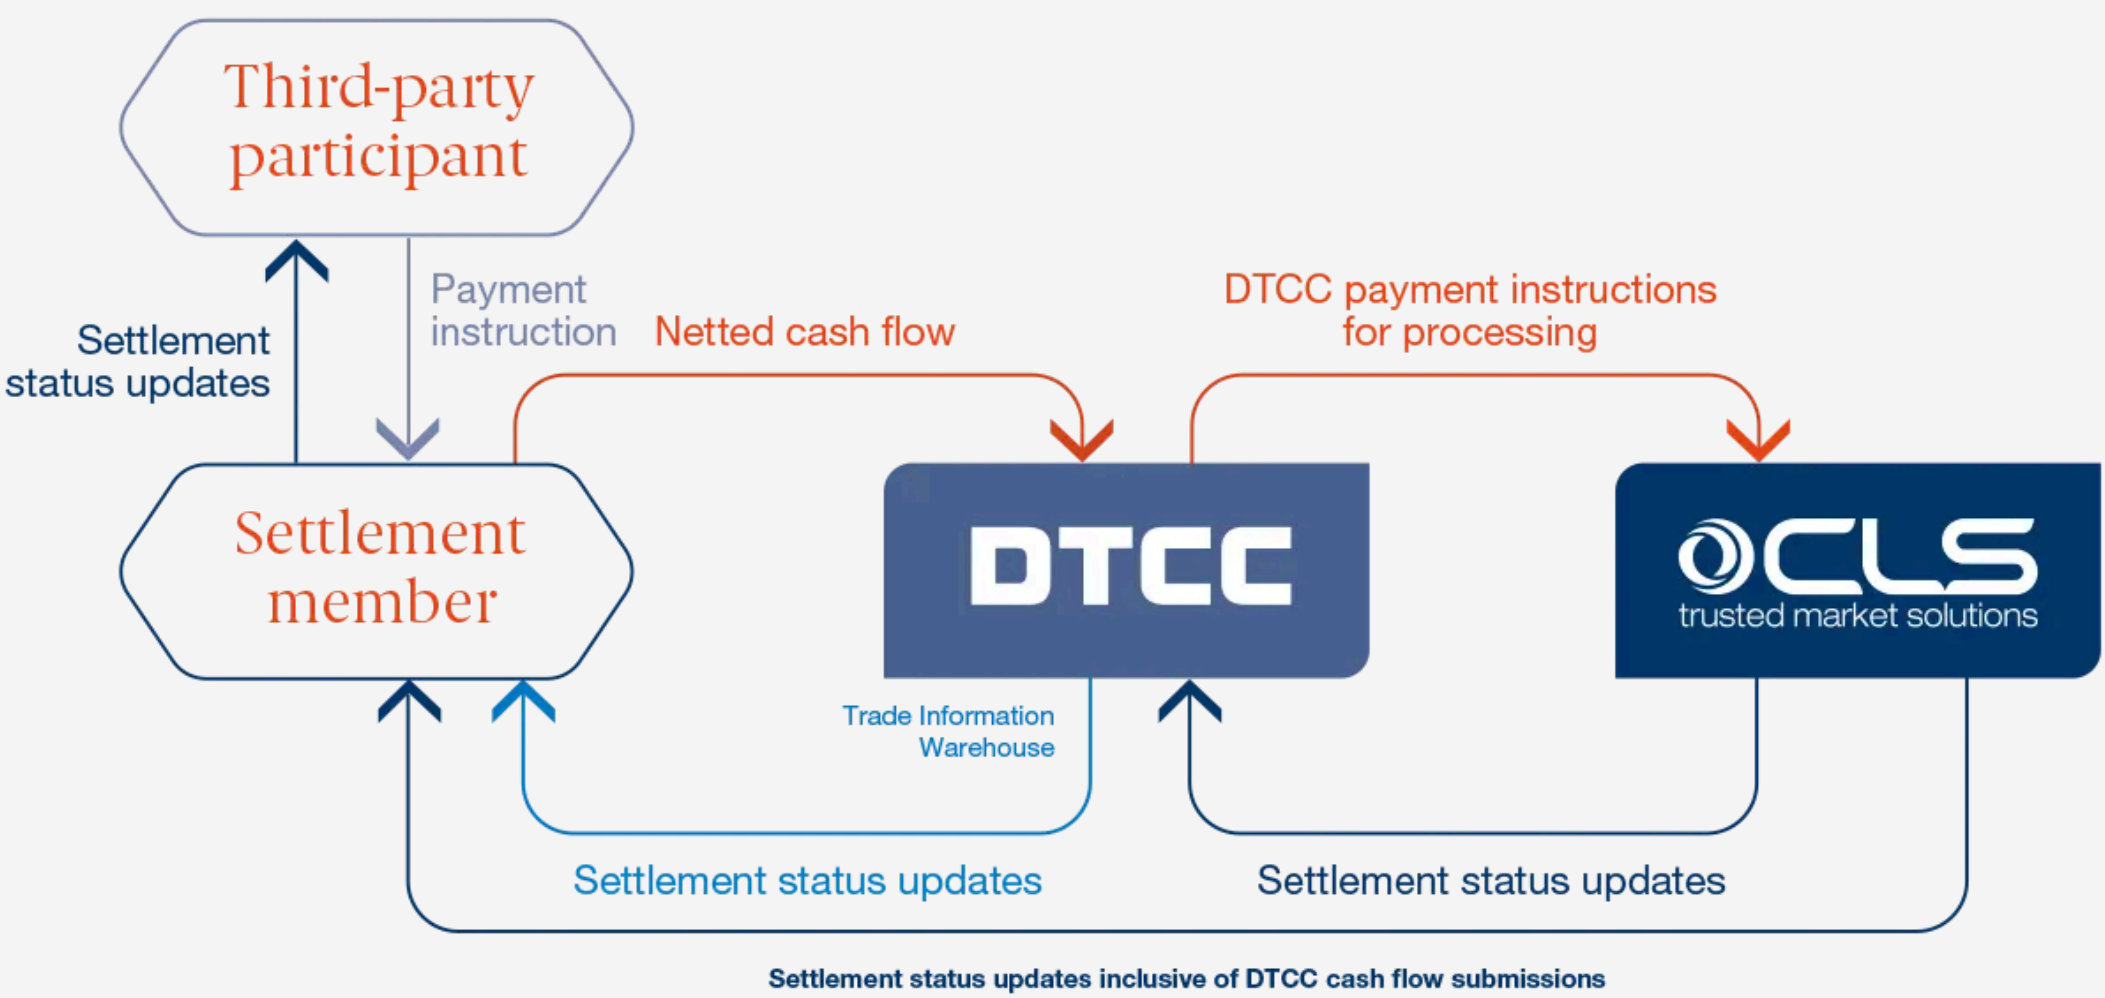

- Best Settlement Initiative 2023, FX Markets e-FX 2023
- Best FX Settlement & Risk Mitigation Solution FX Markets Asia 2022 / 2021 / 2020
- Best Trading Infrastructure Provider American Financial Technology 2021

Benefits:

- Fully automated processing to improve post-trade efficiency for derivatives instruments (CDS, CDX, CDT) and greatly reduce operational risk
- Optimize your operations – through straight-through processing and real-time information regarding settlement and confirmation
- Drive funding efficiency and lower your liquidity requirement through the use of multilateral netting
