

Harness the joint infrastructure power of CLS and DTCC to better manage your OTC credit derivatives cash flows. Improve overall post-trade efficiency and risk management.

OTC Derivatives

Asset managers

Regulatory reform has led to a changing FX settlement landscape with a heightened focus on pre- and post-trade transparency and an increased requirement for transactional reporting.

CLS's OTC Derivatives is an enhanced settlement service model for instructions relating to bilateral net payment obligations for the OTC credit derivatives market. Created in partnership with The Depository Trust & Clearing Corporation (DTCC), the service links DTCC's Trade Information Warehouse with CLS's central multicurrency cash settlement service and automates the processing of OTC credit derivatives-related cash flows.

The benefits

- Fully automated processing to improve post-trade efficiency for derivatives instruments (CDS, CDX, CDT) and greatly reduce operational risk
- Optimize your operations – through straight-through processing and real-time information regarding settlement and confirmation
- Drive funding efficiency and lower your liquidity requirement through the use of multilateral netting

How it works

Asset managers access the service via their custodians – a CLS Settlement member.

The service supports nine currencies: AUD, GBP, CAD, CHF, EUR, HKD JPY, SGD and USD.

Instruction submissions: For each custodian participating in CLSsettlement, DTCC submits netted cash flow amounts for the next value date to CLS in the relevant currencies.

Validation: CLS accepts and validates the cash flows and the accounts.

Settlement: The DTCC cash flows are then incorporated into the custodian's CLSsettlement pay-in schedule and settlement cycle for the next day, along with their submitted FX payment instructions.

Notifications: Notifications are sent back to DTCC following settlement on value date.

Improves:

- > Post-trade processing
- > Operational & funding efficiencies

Reduces:

- > Operational risk

Next steps for asset managers

If you are considering how to better manage risk for your OTC derivatives cash flows:

1. Contact your custodian(s) about the settlement solutions they offer for credit derivatives, including CLS Settlement
2. Contact DTCC to request that central settlement is enabled for your account
3. DTCC will provide you with the necessary documentation and forms to complete
4. Send the form to your custodian to authorize
5. Once complete send the form back to DTCC for final validation. DTCC then submits the form to CLS
6. CLS will then take the necessary steps to permission your account.

For more information about the service and DTCC's Trade Information Warehouse, please contact TIW@DTCC.com.
